**CALIFORNIA ACUTE CARE HOSPITAL SERVICES
STATEWIDE TRENDS, 1992 - 2001**

Source: Annual Utilization
Reports of Hospitals,
1992-2001

Facility inventory data are presented for all licensed community-based hospitals (numbers of facilities and their licensed beds); including those hospitals and beds in-suspense and those hospitals that failed to submit their Annual Hospital Utilization Reports.

Utilization data for all responding community-based, acute facilities are presented.

Data from California State Hospitals are excluded.

Comprehensive E.M.S.

In addition to basic acute hospital services, the hospital must also provide high tech services including acute dialysis, burn center, and cardiovascular and neuro surgery services. In addition to physician coverage in EMS 24x7, the hospital must have representatives from a wide range of medical specialties "on the premises" 24x7, including a psychiatrist, thoracic surgeon, neuro surgeon, orthopedic surgeon, neonatologist, etc. (The chief residents meet the physician specialties criteria.)

Basic E.M.S.

Must have physician coverage in the EMS 24x7.

Standby E.M.S.

Must provide 24 hour, "on call" physician coverage. There is an "on call" doctor responsible for emergency coverage (usually a staff physician with hospital admitting privileges) who must be at the hospital within 30 minutes after receiving a phone call from the hospital.

Total (EMS) Visits

This is a sum of reported Non-Urgent, Urgent and Critical EMS visits
